

## Project Planning Phase

### Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)

|               |  |
|---------------|--|
| Date          | 5-Nov-2022   |
| Team ID       | PNT2022TMID16583   |
| Project Name  | Early Detection of Chronic Kidney Disease Using Machine Learning |
| Maximum Marks | 8 Marks  |

#### Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

| Sprint   | Functional Requirement (Epic) | User Story Number | User Story / Task  | Story Points | Priority | Team Members   |
|----------|-------------------------------|-------------------|--|--------------|----------|--|
| Sprint-1 | Collecting the dataset        | USN-1             | Collected dataset from Kaggle related to our problem statement.                                | 2            | High     | Gokul I<br>Bhuvaneshwaran M<br>Danush A<br>Kishore Kumar A |
| Sprint-1 | Cleaning the dataset          | USN-2             | Cleaning dataset by handling and replacing missing values and making effective for prediction. | 3            | High     | Gokul I<br>Bhuvaneshwaran M<br>Danush A<br>Kishore Kumar A |
| Sprint-1 | Model Building                | USN-3             | Building the model and selecting best ML model based on accuracy for accurate prediction.      | 4            | High     | Gokul I<br>Bhuvaneshwaran M<br>Danush A<br>Kishore Kumar A |

| <b>Sprint</b> | <b>Functional Requirement (Epic)</b> | <b>User Story Number</b> | <b>User Story / Task</b>  | <b>Story Points</b> | <b>Priority</b> | <b>Team Members</b>  |
|---------------|--------------------------------------|--------------------------|---|---------------------|-----------------|--|
| Sprint-1      | Model Evaluation                     | USN-4                    | Evaluating the model and finding accuracy for the model.  | 4                   | High            | Gokul I<br>Bhuvaneshwaran M<br>Danush A<br>Kishore Kumar A |
| Sprint-2      | User Registration                    | USN-5                    | As a user, I can register for the application by entering my email, password, and confirming my password. | 2                   | Medium          | Gokul I<br>Bhuvaneshwaran M<br>Danush A<br>Kishore Kumar A |
| Sprint-2      | User Login                           | USN-6                    | As a user, I can log into the application by entering email & password                                    | 2                   | Medium          | Gokul I<br>Bhuvaneshwaran M<br>Danush A<br>Kishore Kumar A |
| Sprint-2      | User Verification                    | USN-7                    | Verifying the user through email.   | 1                   | Low             | Gokul I<br>Bhuvaneshwaran M<br>Danush A<br>Kishore Kumar A |
| Sprint-2      | Dashboard                            | USN-8                    | Designing HTML Dashboard page to navigate for the logged in users.  | 3                   | Medium          | Gokul I<br>Bhuvaneshwaran M<br>Danush A<br>Kishore Kumar A |
| Sprint-3      | Integration                          | USN-9                    | Using Flask to integrate user dashboard with trained model to predict and request result.                 | 4                   | High            | Gokul I<br>Bhuvaneshwaran M<br>Danush A<br>Kishore Kumar A |

| <b>Sprint</b> | <b>Functional Requirement (Epic)</b> | <b>User Story Number</b> | <b>User Story / Task</b>   | <b>Story Points</b> | <b>Priority</b> | <b>Team Members</b>                                       |
|---------------|--------------------------------------|--------------------------|--|---------------------|-----------------|---|
| Sprint-3      | Train ML Model in IBM                | USN-10                   | The ML model will be trained in IBM by hosting ipynb file in IBM Cloud.                            | 3                   | High            | Gokul I<br>Bhuvaneswaran M<br>Danush A<br>Kishore Kumar A |
| Sprint-3      | Integrating with IBM Cloud           | USN-11                   | Integrating trained IBM Cloud Model with scoring endpoints using flask                             | 4                   | High            | Gokul I<br>Bhuvaneswaran M<br>Danush A<br>Kishore Kumar A |
| Sprint-4      | Deployment                           | USN-12                   | Deploying the IBM model backend flask and frontend application in Cloud                            | 3                   | Medium          | Gokul I<br>Bhuvaneswaran M<br>Danush A<br>Kishore Kumar A |
| Sprint-4      | Further Classification               | USN-13                   | Getting user experience feedback and improving the model and application through customer feedback | 2                   | Medium          | Gokul I<br>Bhuvaneswaran M<br>Danush A<br>Kishore Kumar A |

### Project Tracker, Velocity & Burndown Chart: (4 Marks)

| Sprint   | Total Story Points | Duration | Sprint Start Date | Sprint End Date (Planned) | Story Points Completed (as on Planned End Date) | Sprint Release Date (Actual) |
|----------|--------------------|----------|-------------------|---------------------------|---|------------------------------|
| Sprint-1 | 13                 | 6 Days   | 24 Oct 2022       | 29 Oct 2022               | 13  | 30 Oct 2022                  |
| Sprint-2 | 8                  | 6 Days   | 31 Oct 2022       | 05 Nov 2022               | 8   | 05 Nov 2022                  |
| Sprint-3 | 11                 | 6 Days   | 07 Nov 2022       | 12 Nov 2022               | 11  | 11 Nov 2022                  |
| Sprint-4 | 5                  | 6 Days   | 14 Nov 2022       | 19 Nov 2022               | 5   | 18 Nov 2022                  |

#### Velocity:

Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per iteration unit (story points per day)

$$\text{Sprint 1 AV} = \text{Sprint duration/velocity} = 13/6 = 2.16$$

$$\text{Sprint 2 AV} = \text{Sprint duration/velocity} = 8/6 = 1.33$$

$$\text{Sprint 3 AV} = \text{Sprint duration/velocity} = 11/6 = 1.83$$

$$\text{Sprint 4 AV} = \text{Sprint duration/velocity} = 5/6 = 0.83$$

### Burndown Chart:

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.
